Anthony, Robin,

The Bulky Item Removal Team, comprised of rangers and a formidable maintenance crew will take a look asap. I am sure we can address this.

Hello folks,

If you recall, The Trust for Public land worked with the community several years ago to deal with an individual that was sleeping in Carlton Way Park and having sex there. Please see the email below from Josefina who lives immediately next to the park.

Douglas, can we work with you and your organization to help get some resources out to the park and help the people sleeping there?

Dan, can we send the HOPE team? Also, I am not sure who the Senior Lead for the neighborhood is anymore but please forward me that information so I can reach out to them as well.

Looking forward to ideas about how best we can help this situation. Carlton Way Park is a really small neighborhood park and we want to ensure community members feel safe going there.

Thank you,

Robin Mark

Subject: Carlton way park

Hello Robin it's Josie I don't know if you remember me I live next door. So the reason to my message is because we've been having homeless set up camp in the back of the park and we complained and were told that no one was able to do anything about it also people come to the park to have sex there we've found needles and used condoms the park isn't being used as a park anymore. In the mornings there's a bunch of people showing up to smoke and do their drugs and once they light a pair of pants on fire I call the police but no one is showing up I've complained to the cleaning people and they are no help either.
